

## # What is Animation in CSS?

-> CSS Animation is used to make HTML elements move, change color, size, position, opacity, rotation, etc. automatically over time.

## # Animations help create:

Smooth UI effects

Attractive websites

Interactive user experience

## # Basic Syntax of Animation:

### 1. Animation Using from and to:

-> Used when animation has only starting and ending.

```
@keyframes animationName {
```

```
  from {
```

```
    /* starting style */
```

```
  }
```

```
  to {
```

```
    /* ending style */
```

```
  }
```

```
}
```

### 2. Animation Using Percentage (%):

-> Used when animation has multiple stages.

```
@keyframes animationName{  
  0%{  
  }  
  
  50%{  
  }  
  
  100%{  
  }  
}
```

#### # Animation Properties:

1. animation-name: It defines which animation should run.
2. animation-duration: It defines how much time animation takes to complete.
3. animation-timing-function: It controls the speed style for the animation.  
values: linear | ease (default) | ease-in | ease-out | ease-in-out | steps()
4. animation-delay: Waits before animation starts.
5. animation-iteration-count: It defines how many times animation runs.  
values: 1 (by default) | n | infinite
6. animation-direction: It defines the direction of animation.  
values: normal(default) | reverse | alternate | alternate-reverse

7. animation-play-state: It is used to pause or run animation.

values: running (by default) | paused

8. animation-fill-mode: It defines style before or after animation.

values: none (default) | forwards | backwards

# Animation Shorthand Property:

-> Instead of writing all properties separately, we can write them in one line.

-> Syntax: animation: name duration timing-function delay iteration-count direction fill-mode;

-> Example: animation: moveBox 3s linear 1s infinite alternate forwards;

# Interview Questions:

Q.1. Difference Between Transition and Animation?

Answer: Find out by yourself.

Q.2. What is @keyframes in CSS?

Answer: @keyframes defines the stages of an animation.
