

What is Marquee Tag in HTML?

-> The <marquee> tag in HTML is used to create scrolling text or images on a webpage.

-> The content can move:

Left

Right

Up

Down

Basic Syntax: <marquee behavior="" direction="">Content</marquee>

Here,

1. direction Attribute:

-> Used to change the movement direction.

-> Values

1.left (default)

2.right

3.up

4.down

-> Example: <marquee direction="right"> Moving Right </marquee>

2. Behavior Attribute:

-> Defines how the content moves.

-> Values:

Value	Meaning
scroll =>	Continuous scrolling
slide =>	Moves once and stops
alternate =>	Bounces back and forth

-> Example: `<marquee behavior="scroll"> Scrolling Text </marquee>`

3. scrollamount Attribute:

-> Controls scrolling speed.

Higher value = Faster movement

Lower value = Slower movement

-> Example: `<marquee scrollamount="20"> Fast Text </marquee>`

4. scrolldelay Attribute:

-> Adds delay between each movement.

-> Example: `<marquee scrolldelay="200"> Slow Movement </marquee>`

5. loop Attribute:

-> Specifies how many times marquee repeats.

-> Example: `<marquee loop="3"> Repeats 3 Times </marquee>`

-> Example: `<marquee loop="infinite"> Infinite Loop </marquee>`

6. bgcolor Attribute:

-> Sets background color.

-> Example: `<marquee bgcolor="yellow"> Colored Background </marquee>`

7. width and height:

-> Controls marquee size.

-> Example: `<marquee width="300" height="100"> Custom Size </marquee>`

8. hspace and vspace:

-> Adds spacing around marquee.

-> Example: `<marquee hspace="20" vspace="20"> Spacing Example
</marquee>`

Marquee with Image:

```
<marquee>  
    
</marquee>
```

Multiple Marquee Example:

```
<marquee direction="right" bgcolor="lightblue">  
  Welcome Students  
</marquee>
```

```
<marquee direction="up" height="100">  
  HTML CSS JavaScript  
</marquee>
```

```
<marquee behavior="alternate">  
  Frontend Development  
</marquee>
```

Important Note:

-> <marquee> is a deprecated tag in HTML.

Deprecated Meaning

Old feature

Not recommended to use

May not work in future browsers

Modern websites use:

CSS Animations

JavaScript Animations

-> instead of <marquee>.
